

On Tuesday, April 21, 2015, the Wyoming Department of Agriculture (WDA) was informed of an accident on Highway 30 at mile marker 292 near Rock River, Wyoming, which involved a commercial vehicle carrying pork products. Some of the pork products from that accident have been reported as unaccountable, and the WDA cannot verify the safety of any such products. The WDA suggests that any person who might possess pork products from this crash should refrain from consuming the products.
